BehavePlus
Workshop
March 2007
Slide 1

- Change this slide and the footer information on the master slide to suit the workshop.

Plan of Attack

- Overview
 - What is BehavePlus? What is it used for?
 - Past, Present, Future
- BehavePlus operation
 - Simple run
 - Crown fire
 - Prescribed fire application
- Discussion
 - How to learn more. www.FireModels.org

- This is a brief overview of the topics to be discussed in this half-day workshop.
- I will start with an overview presentation on BehavePlus including a review of fire modeling capabilities.
- A handout paper gives an overview for your reference. Andrews (2007).
- I will demonstrate operation of the program
- We will start with a simple run where you enter input and get results without worrying about the many options that are available.
- Then I will demonstrate how BehavePlus can be used for crown fire modeling.
- I will give a PowerPoint presentation on application of BehavePlus for prescribed fire planning
- Then I will demonstrate using the program to produce prescription windows (table shading option).
- Are there are questions that you hope will be addressed during this workshop?

Objective

- Demonstrate and discuss the operation and fire modeling capabilities of BehavePlus to inspire you to learn more.

BehavePlus
Workshop
March 2007
Slide 3

- This is just a brief introduction to BehavePlus
- The objective is not to teach you to effectively use the system
- Rather the goal is to show you enough about the system for you to see whether it meets your needs.
- And if so, to inspire you to learn more about it.
