

Instructions for joining Fire Behavior Prediction iPhone beta

Thanks for your interest in the Mountain Hub Fire Behavior Prediction demo! Here's what you need to do to get this on your iPhone. A few things first...

- This is only for iPhone for the pilot project. If it's successful, we'll look at adding Android support for 2022.
- If you've used Mountain Hub before, you'll still need to make a new account. This beta pilot program is a stand-alone, special version of the app.
- We're using a tool called TestFlight to get the app to you.

Here's how to sign up:

1. To join the beta, email Zav at zav.grabinski@alaska.edu to be added to the list of beta users for this summer.
2. An email will be sent to you from TestFlight which will explain how to download TestFlight onto your iPhone. Follow the instructions in the email to download the free iOS app TestFlight and enter the provided code to be allowed to download Mountain Hub.
3. Within the TestFlight app, click the Install button for Mountain Hub. This will install a beta-testing version of Mountain Hub as an app on your phone for the purposes of testing the Fire Behavior Predictor functions.
4. In the downloaded Mountain Hub app, sign up for a new account and you will be added to the list of users able to use these features

If you have any questions or feedback, please contact Zav at zav.grabinski@alaska.edu.
