Alaska NSF EPSCoR presents a Science Pub event

Predicting fire seasons in Alaska’s changing climate

It’s no easy task to forecast fire activity across a whole summer, and climate change can throw a proverbial monkey wrench into the works. But that’s not stopping researchers like UAF Professor of Atmospheric Science Uma Bhatt. Grab a beer and join Bhatt for an engaging presentation and discussion about the ways scientists predict fire seasons, and about how they’re adding a changing climate into the mix.

Wednesday, April 17 • 5:30 - 6:30 PM
